## NORTH AMERICAN WALNUT

RIFT & QUARTER SAWN LUMBER

The Rift & Quartered Northern Black Walnut offers buyers a volume source for a rare cut of hardwood in an already rare species. Rift & Quartered Walnut lumber is used for fine furniture, architectural woodwork, musical instruments, decorative panels, interior trim, and flooring and is more in demand today than ever before as it offers buyers a straight grained, dark, native North American hardwood

### GENERAL GRADE RULES

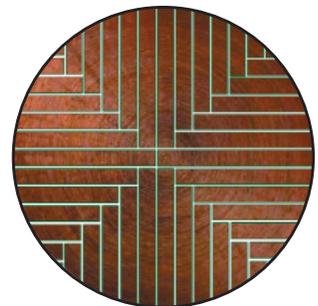

Graded to National Hardwood Lumber Association Grading rules for Select & Better, #1 Common and #2 Common grades. Below are the general grades we use.

	Select & Better	#1 Common	#2 Common
% Clear	83-1/3%	66-2/3%	50%
Cutting Sizes	4" x 5' or 3" x 7'	4" x 2' or 3" x 3'	3" x 2'
Lengths	6' and longer	4' and longer	4' and longer
Widths	4" and wider	3" and wider	3" and wider

For a complete grade see the National Hardwood Lumber Association grading rules book.

See species photos and descriptions for specific notations on width and color.

A quartered board features medullary ray or "fleck" perpendicular to a grain which typically forms angles from 60 degrees to 90 degrees with the board's surface. A rift board exhibits a clean, straight, vertical grain pattern which typically forms angles from 30 degrees to 60 degrees with the board's surface. A combination of rift and quarter-sawn lumber is often used by wood craftsmen to achieve a balanced, interesting imaginative effect.

### AVAILABLE THICKNESSES:

4/4, 5/4\*, 6/4\*, 8/4\*

\* Thickness available by special order only.
